AGP mounted mist blowers

100-400 TN-TEN

100 l, 200 l, 250 l, 400 l

Quality spraying with great savings

The mounted mist blowers AGP 100 TN, AGP 200 TN, 250 TEN and AGP 400 TEN are modern machines designed to protect orchards and vineyards against diseases and pests. Because of its simple structure, the machine is easy to use and enables an optimum spray application. The mist blower also includes a metal ring in order to improve airflow quality by increasing the centre positioning of the fan. The fan with adjustable vanes protects the young as well as older plantations.
