AGP mounted mist blowers

100-440

100 I, 200 I, 330 I, 440 I

Quality spraying with great savings

Easy usage and price availability are two main goals we pursue by making the mounted mist blowers AGP 100–440. A simple design and robust construction enables long life of the mist blower. Lightweight design allows use with smaller tractors. An additional advantage of the mist blower is also completely undemanding maintenance and low operating costs. You can choose between three different models: with a round blower or with air deflector 130 cm or 170 cm.
